MEASUREMENT TRANSMITTER FOR DC VOLTAGE AND CURRENT SIGNALS

Measurement transmitter designed to convert any not-normalised DC voltage or current signal into a normalised signal while providing galvanic insulation.

**Features**
- Voltage or current input
- Galvanic isolation 2 kV RMS, 50 Hz during max. 60 s between input, output and power supply
- Selection of input and output ranges by jumpers behind the front plate
- Wide range of power supplies
- Rail DIN mounting
- Weight: 130 g
- Compliant with EMC EN 50082-2

**Application(s)**
SENSY’s CONV-UI is perfectly designed for the following applications:
- Galvanic isolation of measurement signals,
- Multiplication of measurement signals from a single source.

**Function(s)**
- Universal
- User-friendly configuration
- Reduced size

**Specifications**
